## ESSAY IN DEVELOPMENT

- Kimelman, D., Christian, J. L. and Moon, R. T.**  
Synergistic principles of development:  
overlapping patterning system in *Xenopus*  
mesoderm induction

1-9

## CONTRIBUTED PAPERS

- Kuhn, D. T., Sawyer, M., Packert, G.,  
Turechalk, G., Mack, J. A., Sprey, Th. E.,  
Gustavson, E. and Kornberg, T. B.**

Development of the *D. melanogaster* caudal  
segments involves suppression of the ventral  
regions of A8, A9 and A10

11-20

- Smith, L. G., Greene, B., Veit, B. and Hake, S.**  
A dominant mutation in the maize homeobox  
gene, *Knotted-1*, causes its ectopic expression  
in leaf cells with altered fates

21-30

- Rao, Y., Bodmer, R., Jan, L. Y. and Jan, Y. N.**  
The *big brain* gene of *Drosophila* functions to  
control the number of neuronal precursors in the  
peripheral nervous system

31-40

- Brenner, H. R., Herczeg, A. and Slater, C. R.**  
Synapse-specific expression of acetylcholine  
receptor genes and their products at original  
synaptic sites in rat soleus muscle fibres  
regenerating in the absence of innervation

41-53

- Wagner, M., Han, B. and Jessell, T. M.**  
Regional differences in retinoid release from  
embryonic neural tissue detected by an in vitro  
reporter assay

55-66

- Ruiz i Altaba, A.**  
Planar and vertical signals in the induction and  
patterning of the *Xenopus* nervous system

67-80

- Ruiz i Altaba, A. and Jessell, T. M.**  
*Pintallavis*, a gene expressed in the organizer  
and midline cells of frog embryos: involvement in  
the development of the neural axis

81-93

- Jägerbauer, E.-M., Fraser, A., Herbst, E. W.,  
Kothary, R. and Fundele, R.**  
Parthenogenetic stem cells in postnatal mouse  
chimeras

95-102

- French, V. and Brakefield, P. M.**  
The development of eyespot patterns on  
butterfly wings: morphogen sources or sinks?

103-109

- Schmidt-Ott, U. and Techniqu, G. M.**  
Expression of *en* and *wg* in the embryonic head  
and brain of *Drosophila* indicates a refolded  
band of seven segment remnants

111-125

- Hertzler, P. L. and Clark, W. H. Jr**  
Cleavage and gastrulation in the shrimp  
*Sicyonia ingentis*: invagination is accompanied  
by oriented cell division

127-140

- Otte, A. P., McGrew, L. L., Olate, J., Nathanson,  
N. M. and Moon, R. T.**

Expression and potential functions of G-protein  
a subunits in embryos of *Xenopus laevis*

141-146

- Umbhauer, M., Riou, J.-F., Spring, J., Smith, J.  
C. and Boucat, J.-C.**

Expression of tenascin mRNA in mesoderm  
during *Xenopus laevis* embryogenesis: the  
potential role of mesoderm patterning in tenascin  
regionalization

147-157

- Narisawa, S., Hofmann, M.-C., Ziomek, C. A.  
and Millán, J. L.**

Embryonic alkaline phosphatase is expressed at  
M-phase in the spermatogenic lineage of the  
mouse

159-165

- Kapur, R. P., Yost, C. and Palmiter, R. D.**

A transgenic model for studying development of  
the enteric nervous system in normal and  
aganglionic mice

167-175

- Goode, S., Wright, D. and Mahowald, A. P.**  
The neurogenic locus *brainiac* cooperates with  
the *Drosophila* EGF receptor to establish the  
ovarian follicle and to determine its dorsal-  
ventral polarity

177-192

- Collarini, E. J., Kuhn, R., Marshall, C. J.,  
Monuki, E. S., Lemke, G. and Richardson,  
W. D.**

Down-regulation of the POU transcription factor  
SCIP is an early event in oligodendrocyte  
differentiation in vitro

193-200

- Mullen, R. J., Buck, C. R. and Smith, A. M.**  
NeuN, a neuronal specific nuclear protein in  
vertebrates

201-211

- Tilney, L. G., Cotanche, D. A. and Tilney, M. S.**  
Actin filaments, stereocilia and hair cells of the  
bird cochlea. VI. How the number and  
arrangement of stereocilia are determined

213-226

- Nieto, M. A., Bennett, M. F., Sargent, M. G. and  
Wilkinson, D. G.**

Cloning and developmental expression of *Sna*, a  
murine homologue of the *Drosophila* *snail* gene

227-237

- Bunch, T. A. and Brower, D. L.**  
*Drosophila* PS2 integrin mediates RGD-  
dependent cell-matrix interactions

239-247

- Krauss, S., Korzh, V., Fjose, A. and Johansen,  
T.**

Expression of four zebrafish *wnt*-related genes  
during embryogenesis

249-259

- Shi, D.-L., Feige, J.-J., Riou, J.-F., DeSimone,  
D. W. and Boucat, J.-C.**

Differential expression and regulation of two  
distinct fibroblast growth factor receptors during  
early development of the urodele amphibian  
*Pleurodeles waltl*

261-273

## Contents

<b>Delannet, M. and Duband, J.-L.</b> Transforming growth factor- $\beta$ control of cell-substratum adhesion during avian neural crest cell emigration in vitro	275-287	<b>Courtot, C., Frankhauser, C., Simanis, V. and Lehner, C. F.</b> The <i>Drosophila</i> <i>cdc25</i> homolog <i>twine</i> is required for meiosis	405-416
<b>ESSAY IN DEVELOPMENT</b>			
<b>Tabin, C. J.</b> Why we have (only) five fingers per hand: Hox genes and the evolution of paired limbs	289-296	<b>Chandrasekhar, A., Ennis, H. L. and Soll, D. R.</b> Biological and molecular correlates between induced dedifferentiation and spore germination in <i>Dictyostelium</i>	417-425
<b>CONTRIBUTED PAPERS</b>			
<b>Serbedzija, G. N., Bronner-Fraser, M. and Fraser, S. E.</b> Vital dye analysis of cranial neural crest cell migration in the mouse embryo	297-307	<b>Becker, T. and Macagno, E. R.</b> CNS control of a critical period for peripheral induction of central neurons in the leech	427-434
<b>Yuan, J. and Horvitz, H. R.</b> The <i>Caenorhabditis elegans</i> cell death gene <i>ced-4</i> encodes a novel protein and is expressed during the period of extensive programmed cell death	309-320	<b>Flamme, I. and Risau, W.</b> Induction of vasculogenesis and hematopoiesis in vitro	435-439
<b>Andres, V., Nadal-Ginard, B. and Mahdavi, V.</b> <i>Clox</i> , a mammalian homeobox gene related to <i>Drosophila cut</i> , encodes DNA-binding regulatory proteins differentially expressed during development	321-334	<b>Goldstein, R. S. and Kalcheim, C.</b> Determination of epithelial half-somites in skeletal morphogenesis	441-445
<b>Freeman, M., Kimmel, B. E. and Rubin, G. M.</b> Identifying targets of the <i>rough</i> homeobox gene of <i>Drosophila</i> : evidence that <i>rhomboid</i> functions in eye development	335-346	<b>Tremml, G. and Bienz, M.</b> Induction of <i>labial</i> expression in the <i>Drosophila</i> endoderm: response elements for <i>dpp</i> signalling and for autoregulation	447-456
<b>Hainski, A. M. and Moody, S. A.</b> <i>Xenopus</i> maternal RNAs from a dorsal animal blastomere induce a secondary axis in host embryos	347-355	<b>Waring, D. A., Wrischnik, L. and Kenyon, C.</b> Cell signals allow the expression of a pre-existent neural pattern in <i>C. elegans</i>	457-466
<b>Conlon, R. and Rossant, J.</b> Exogenous retinoic acid rapidly induces anterior ectopic expression of murine <i>Hox-2</i> genes in vivo	357-368	<b>Norbeck, B. A., Feng, Y. and Denburg, J. L.</b> Molecular gradients along the proximal-distal axis of embryonic insect legs: possible guidance cues of pioneer axon growth	467-479
<b>Maeda, H., Yamagata, A., Nishikawa, S., Yoshinaga, K., Kobayashi, S., Nishi, K. and Nishikawa, S.-I.</b> Requirement of <i>c-kit</i> for development of intestinal pacemaker system	369-375	<b>Cowing, D. W. and Kenyon, C.</b> Expression of the homeotic gene <i>mab-5</i> during <i>Caenorhabditis elegans</i> embryogenesis	481-490
<b>Lüer, K. and Technau, G. M.</b> Primary culture of single ectodermal precursors of <i>Drosophila</i> reveals a dorsoventral prepattern of intrinsic neurogenic and epidermogenic capabilities at the early gastrula stage	377-385	<b>Shamley, D. R., Opperman, L. A., Buffenstein, R. and Ross, F. P.</b> Ontogeny of calbindin-D <sub>28k</sub> and calbindin-D <sub>9k</sub> in the mouse kidney, duodenum, cerebellum and placenta	491-496
<b>DeFrances, M. C., Wolf, H. K., Michalopoulos, G. K. and Zarnegar, R.</b> The presence of hepatocyte growth factor in the developing rat	387-395	<b>Geada, A. M. C., Gaunt, S. J., Azzawi, M., Shimeld, S. M., Pearce, J. and Sharpe, P. T.</b> Sequence and embryonic expression of the murine <i>Hox-3.5</i> gene	497-506
<b>Leyser, H. M. O. and Furner, I. J.</b> Characterisation of three shoot apical meristem mutants of <i>Arabidopsis thaliana</i>	397-403	<b>Götz, M., Novak, N., Bastmeyer, M. and Bolz, J.</b> Membrane-bound molecules in rat cerebral cortex regulate thalamic innervation	507-519
		<b>Nishida, H.</b> Regionality of egg cytoplasm that promotes muscle differentiation in embryo of the ascidian, <i>Halocynthia roretzi</i>	521-529
		<b>Lallier, T., Leblanc, G., Artinger, K. B. and Bronner-Fraser, M.</b> Cranial and trunk neural crest cells use different mechanisms for attachment to extracellular matrices	531-541

<b>Hinz, U., Wolk, A. and Renkawitz-Pohl, R.</b> <i>Ultrabithorax</i> is a regulator of $\beta 3$ tubulin expression in the <i>Drosophila</i> visceral mesoderm	543-554	<b>Nardelli-Haeffliger, D. and Shankland, M.</b> <i>Lox2</i> , a putative leech segment identity gene, is expressed in the same segmental domain in different stem cell lineages	697-710
<b>Smith, D. E. and Gridley, T.</b> Differential screening of a PCR-generated mouse embryo cDNA library: glucose transporters are differentially expressed in early postimplantation mouse embryos	555-561	<b>Noordermeer, J., Johnston, P., Rijsewijk, F., Nusse, R. and Lawrence, P. A.</b> The consequences of ubiquitous expression of the <i>wingless</i> gene in the <i>Drosophila</i> embryo	711-719
<b>Horne, K. A. and Jahoda, C. A. B.</b> Restoration of hair growth by surgical implantation of follicular dermal sheath	563-571	<b>Volk, T.</b> A new member of the spectin superfamily may participate in the formation of embryonic muscle attachments in <i>Drosophila</i>	721-730
<b>Pruitt, S. C.</b> Expression of a <i>Pax-3</i> - and neuroectoderm-inducing activities during differentiation of P19 embryonal carcinoma stem cells	573-583	<b>Rao, M. S., Patterson, P. H. and Landis, S. C.</b> Multiple cholinergic differentiation factors are present in footpad extracts: comparison with known cholinergic factors	731-744
<b>Duband, J.-L., Belkin, A. M., Syfrig, J., Thiery, J. P. and Koteliensky, V. E.</b> Expression of $\alpha 1$ integrin, a laminin-collagen receptor, during myogenesis and neurogenesis in the avian embryo	585-600	<b>Skaer, H. and Martinez Arias, A.</b> The <i>wingless</i> product is required for cell proliferation in the Malpighian tubule anlage of <i>Drosophila melanogaster</i>	745-754
<b>Usui, K. and Kimura, K.-I.</b> Sensory mother cells are selected from among mitotically quiescent cluster of cells in the wing disc of <i>Drosophila</i>	601-610	<b>Beanan, M. J. and Strome, S.</b> Characterization of a germ-line proliferation mutation in <i>C. elegans</i>	755-766
<b>Poleev, A., Fickenschner, H., Mundlos, S., Winterpacht, A., Zabel, B., Fidler, A., Gruss, P. and Plachov, D.</b> <i>PAX8</i> , a human paired box gene: isolation and expression in developing thyroid, kidney and Wilms' tumors	611-623	<b>Lefcort, F., Venstrom, K., McDonald, J. A. and Reichardt, L. F.</b> Regulation of expression of fibronectin and its receptor $\alpha 5 \beta 1$ , during development and regeneration of peripheral nerve	767-782
<b>Sumi, Y., Dent, M. A. R., Owen, D. E., Seeley, P. J. and Morris, R. J.</b> The expression of tissue and urokinase-type plasminogen activators in neural development suggests different modes of proteolytic involvement in neuronal growth	625-637	<b>Cereghini, S., Ott, M.-O., Power, S. and Maury, M.</b> Expression patterns of vHNF1 and HNF1 homeoproteins in early postimplantation embryos suggest distinct and sequential developmental roles	783-797
<b>Risek, B., Klier, F. G. and Gilula, N. B.</b> Multiple gap junction genes are utilized during rat skin and hair development	639-651	<b>Schimmang, T., Lemaistre, M., Vortkamp, A. and Rüther, U.</b> Expression of the zinc finger gene <i>Gl/3</i> is affected in the morphogenetic mouse mutant <i>extra-toes (Xt)</i>	799-804
<b>Holland, P. W. H., Holland, L. Z., Williams, N. A. and Holland, N. D.</b> An amphioxus homeobox gene: sequence conservation, spatial expression during development and insights into vertebrate evolution	653-661	<b>Moazed, D. and O'Farrell, P. H.</b> Maintenance of the <i>engrailed</i> expression pattern by <i>polycomb</i> group genes in <i>Drosophila</i>	805-810
<b>Vaughan, T. J., James, P. S., Pascall, J. C. and Brown, K. D.</b> Expression of the genes for TGF $\alpha$ , EGF and the EGF receptor during early pig development	663-669	<b>Ros, M. A., Lyons, G., Kosher, R. A., Upholt, W. B., Coelho, C. N. D. and Fallon, J. F.</b> Apical ridge dependent and independent mesodermal domains of <i>GHox-7</i> and <i>GHox-8</i> expression in chick limb buds	811-818
<b>Hardin, J., Coffman, J. A., Black, S. D. and McClay, D. R.</b> Commitment along the dorsoventral axis of the sea urchin embryo is altered in response to NiCl <sub>2</sub>	671-685	<b>Eyal-Giladi, H., Debby, A. and Harel, N.</b> The posterior section of the chick's area pellucida and its involvement in hypoblast and primitive streak formation	819-830
